

This gear oil is a semi-synthetic lubricating oil for mechanical transmissions, formulated with high quality special refined and synthetic base oils and special EP-additives to obtain the following properties:

excellent resistance against oxidation  
a very high activity against wear, corrosion and foam  
a low pour point  
very good EP-properties  
fuel economy

### Applications

This gear oil is used in hypoid differentials under very heavy duty conditions and should be used in all transmissions that require EP-transmission oils.
